Introduction

Our Thanks to You and Customer Assistance

Thank you for purchasing a CobraMarine™ VHF radio. Properly used, this Cobra® product will give you many years of reliable service.

How Your CobraMarine™ VHF Radio Works

This radio is a battery powered portable transceiver for use afloat. It gives you two-way vessel-to-vessel and vessel-to-shore station communications, primarily for safety and secondarily for navigation and operational purposes. With it, you can call for help, get information from other boaters, talk to lock or bridge tenders, and make radiotelephone calls to anywhere in the world through a marine operator.

Besides two-way communications, the radio can provide quick access to receive all 10 NOAA (National Oceanographic and Atmospheric Administration) weather channels and alert you to weather emergencies on a weather channel you can select for your area.

NOTE

Your equipment will be black. White images are shown in this manual for illustration purposes only.

Customer Assistance
