Ciglow
INDUSTRIAL SERVICES LIMITED

The CIG-7N wall mounted Flameless Cigarette Lighter unit houses our fast heating element inside a stylish and robust slim line powder coated enclosure. The CIG-7N has been designed for use in environments where naked flames pose a risk to people, property and assets.

The Ciglow lighter unit enables smoking to take place in a controlled environment thus eliminating the potential for people to harm themselves or others whilst protecting property and assets.

Dimensions (mm)

- Height: 220
- Width: 65
- Depth: 80

Colour

- Black

Benefits

Ciglow Flameless Cigarette Lighters provide you with greater control over the smoking habits of people on site. This can greatly reduce the risks posed by fire whilst providing a stylish solution to the problem of managing smoking without antagonising and alienating smokers. By eliminating lighters and matches you reduce the risk for people to harm themselves and others around them whilst protecting your assets from fire.

The Ciglow Timer

The CIG-7N unit comes fitted with the Control Timer as standard.

The Control Timer allows the user to push and release the button allowing the unit to electronically heat the element on a timed cycle, this includes a cooling down period to protect the unit and element. The Control Timer option is ideal for challenging environments where the unit may be exposed to high levels of use and the potential for misuse.

“The Ciglow lighter unit has reduced the risk of fire and explosion within our plant. The appearance and quality of the product is excellent and I would recommend the Ciglow lighter unit”
